

uPVC Vertical Sliding Windows

Combining modern design and technology with traditional, classic looks, this elegant uPVC vertical slider represents outstanding quality and value for the Homeowner and the Installer.

With low line beads, enhanced weather protection and inward tilting sashes for easy cleaning, the vertical slider is ideal for the discerning homeowner.

Naturally, the Vertical Slider complies with current thermal efficiency guidelines and building regulations (when used with approved glass) and superior security is provided thanks to an innovative aluminium security bar and advanced hardware.

All in all, the WestEnd Windows Vertical Slider is a premium product that is aesthetically pleasing, installer friendly and the perfect choice for the traditional home.

Features:

- ✓ Featured, ovalo design - to improve aesthetics and traditional 'kerb appeal'
- ✓ Triple Seals - for enhanced thermal and weather performance.
- ✓ 24mm Glazing - combined with energy efficient glass to reduce fuel bills
- ✓ Clearline glazing - low sightlines for a more traditional, attractive looking window
- ✓ Superior security - stronger by design with special reinforced, advanced hardware and anti-jemmy security bar.
- ✓ Decorative Horns - to give that traditional look to the Georgian era. Combine with authentic georgian bar for a truely classic look.
